OIT 069-87  
12 February 1987

MEMORANDUM FOR: Deputy Director for Administration

FROM: Edward J. Maloney  
Director of Information Technology

SUBJECT: Weekly Report for Week Ending 13 <sup>February</sup> ~~January~~ 1987

25X1 1. The Cable Dissemination System (CDS) received a record 16,731 messages on 5 February. The previous record of just over 15,000 messages received for one 24-hour period was established on 11 September 1986. CDS experienced a 4-hour outage on 5 February. The cause of failure has been attributed to multiple hardware and software problems. The failure and subsequent recovery of narrative messages created a backlog of routine precedence traffic, all processed by the evening of 8 February. There were no significant delays processing high precedence traffic. [redacted]

25X1 4. A new release of the AIM software was delivered to the [redacted] and Northside computer systems. The new software version contains a major performance enhancement that provides improved response time to customers. Additionally, the storage capacity of the largest AIM system, the Decision Support and Information System for Terrorism (DESIST), has been increased to accomodate larger data volumes. [redacted]

25X1 [redacted]
